TMH receives American College of Radiology Accreditation

Warren, April 14, 2010 — Continuing its commitment to quality patient care, Trumbull Memorial Hospital has been awarded a three-year term of accreditation in Ultrasound Imaging Services from the American College of Radiology after a recent survey.

This accreditation not only shows the investment that Trumbull Memorial Hospital has made in its medical technology, but also the quality of the registered ultrasound technologists and medical staff that continue to meet the healthcare needs of the Valley. TMH prides itself on incorporating state-of-the-art equipment with trained specialists to effectively diagnose and treat patients.

“We’ve continued to update our technology at TMH. We were the first hospital in the area to provide digital mammography and are supported by the very best radiologists in the area,” said Nancy James, Director of Medical Imaging.

TMH received this distinction for its high standards of practice after rigorous peer-review evaluations of the hospital, the personnel and the medical technology. Evaluations are conducted by board-certified physicians and medical physicists who are experts in their fields.

“This accreditation verifies the good work our entire team of physicians and clinical specialist provides. We are dedicated to providing high-quality patient care to people in this community,” said Dr. Richard J. Loges, III, President, Trumbull Radiologists Inc.

The ACR is a national organization serving more than 32,000 diagnostic and interventional radiologists, radiation oncologists and nuclear medicine and medical physicists with programs focusing on the practice of medical imaging and radiation oncology and the delivery of healthcare services.
